

43pl is the international consortium of SMEs in the CRC for Spatial Information

Esri Australia is the nation's leading Geographic Information System (GIS) and location intelligence specialist. For more than three decades Esri Australia has partnered with thousands of government and commercial enterprises to deliver quality GIS solutions that have transformed the way organisations address opportunities and challenges.

Services

Products

When it comes to our GIS technology, it's not just exceptional, it sets the benchmark. There really is nothing quite like the Esri product. Coupled with the Midas touch of our people, the technology generates valuable intelligence – enabling organisations to use geographic patterns and insights to predict and plan for the future, with truly transformational results.

GIS Services and Solutions

The human element – analysis, advice, expertise – is what brings to life the capabilities of our cutting-edge GIS technology. In everything we do, we think strategically, solve problems and effectively contribute to our clients' success. Whether saving money, increasing revenues or streamlining operations, our solutions are tailor-made to our clients' requirements.

About Esri Australia

Esri Australia is the nation's leading Geographic Information System (GIS) specialist. From humble beginnings in 1977 – a single office based in Perth – we have expanded into seven capital cities and have the capacity to service clients across the country. In our 34 years, we have worked with thousands of clients, across a diverse range of sectors. This gives us the confidence and capability to tackle any challenge, in any industry.

To us, geography is the key. GIS employs the science of geography to map and analyse information. As market leaders in this space, we use cutting-edge technology to deliver valuable location-based intelligence to our clients – a process that helps them to see more and do more with their information. We are at the forefront of the \$2.1 billion Australian GIS industry and have a peerless reputation for delivering solutions that transform how organisations identify opportunities and unlock potential.

Our people are problem solvers. Armed with premium products, the Esri Australia team applies an investigative, analytical approach to find solutions to the most complex challenges. We've successfully assembled Australia's largest group of GIS professionals, highly skilled in areas including business analytics, environmental science, surveying, cartography and software development. As a result, Esri Australia's services continue to set both national and international benchmarks.

Underpinning our market position is a genuine passion for what we do. We are committed to making a difference – in the corporate world and wider community. This passion for the science behind GIS and considered, insightful approach enables us to deliver exceptional results.

Collaboration is also central to the way we operate – with every assignment we bring our extensive experience and expertise. We've been an integral part of some of the most exciting GIS projects on Australian shores and work many of the nation's most progressive geo-enabled enterprises.

Leading Australian businesses, along with state and local governments and Federal agencies, are among those who look to Esri Australia for truly transformative solutions.
