Market Sectors

B & P Surveys is a long established firm which generally operates in south east Queensland and northern New South Wales. Our primary coverage area stretches north of the Sunshine Coast (QLD), south of Grafton (NSW) and westward to the Toowoomba region. However, in order to cater for our diverse client base, our experienced staff and resources enables us the ability to perform work beyond these areas where necessary.

Product / Service Example 1

Brighton on Broadwater: A variety of 1165 living environments built over nine stages, ranging in height from 40 storeys to three and four storey residential towers located between Southport City Centre and Main Beach. Services: Topographic surveys, construction setout surveys, as-constructed and monitoring (vertical and horizontal) surveys, subdivision surveys, volumetric reconfiguration and strata titling.

Road-bridge05

Tugun Bypass

Product / Service Example 2

Tugun Bypass: A 7.5km long high-speed motorway link between the Gold Coast and northern New South Wales. There is a 400 metre tunnel under the extension of the Gold Coast Airport runway and numerous culverts and bridges throughout.

Spatial Information Disciplines

GIS and spatial analysis/visualisation, Land surveying, Engineering and mining surveying
