

43pl is the international consortium of SMEs in the CRC for Spatial Information

Mercury Project Solutions is a collective of Independent Spatial Information Consultants.

Services

Mercury Project Solutions delivers services to top tier clients in both the public and private sector to solve complex location business problems. We are about thinking and doing: strategy and implementation.

Ultimately, Mercury is about delivering business results that really matter to you. We are with you all the way: from Idea, via Planning to Execution.

Idea

Understanding your needs and developing a vision to meet those needs

- Enterprise Strategy Development
- Situation and User-needs Analysis
- Business Case Creation

Planning

Development of an achievable and affordable implementation approach

- Solution Architecture and Design
- Program and Project Scoping
- Resource Planning and Costing

Execution

Delivery of quality outcomes, on time and on budget

- Program and Project Management
- Quality Assurance
- Stakeholder Coordination

Market Sectors

Mercury Project Solutions works with a range of large and small enterprises, as well as government departments from Australia, New Zealand, and around the world.

It works within many market segments, including agriculture; asset & facilities management; civic administration; civil/building construction; environmental management & monitoring; land development, titling & administration; marketing; resources & mining; social services; communications; tourism; transport; urban planning; and utilities.
